

## 14-day Quarantine for Travel Returnees

Important Information from the Department of Health, Graz

### **Many people become infected with the virus while abroad**

Majority of the people who have recently tested positive to the Covid-19, are travelers returning from Corona high-risk regions. Amongst these regions are currently Serbia, Bosnia-Herzegovina, Albania, Moldova, Afghanistan, Pakistan, India etc. (per July 2020)

### **14 days of self-quarantine is obligatory!**

You have been to a country outside the EU or outside the Schengen zone and are traveling back to Austria. In this case, you must either observe a 14-day self-quarantine or present a medical certificate with a negative PCR test.

Regulation on Travel to Austria in accordance with § 2, all countries except those listed in Appendix A are affected.

**At the border (checkpoint)**, you have to sign a declaration stating that you will comply with a 14-day self-quarantine.

Important: If you were not checked at the border and did not sign a declaration, you are still obliged to comply with a **self-quarantine for 14 days**.

### **Monitoring the Quarantine:**

The authorities will monitor compliance with the quarantine. Non-compliance will attract fines.

People who disregard the quarantine and infect other persons with the virus during this period will face additional criminal penalties.

**Please help us to prevent the spread of the corona virus!**
